To whom it may concern,

I am writing to you to express my interest in working for your company. I truly believe that my attitude paired with my technical proficiency serve to exemplify why I am qualified to be a part of your team.

As a previous intern at SPAWAR, I led a new research team to developing automated testing solutions for the Global Command and Control System - Maritime software on naval ships. In doing so, we have created a system of test automation scripts and procedures cutting down test times by over 57%. Our research also let us cut installation times from 17 days to 5 days on-board ships.

At my internship with Softketeers Inc., I contributed to the development of the company's new product, a cloud-based retail management system. Developing with new tools in addition to handling massive data from big box retailers has deeply contributed to the growth of my problem-solving skills.

Lastly, I also possess many project leadership experiences, from founding an engineering fraternity to leading engineering projects designed for conferences and other stakeholders. All of these experiences have allowed me to engineer great products that would exemplify my contribution to your company.

Once again, I am extremely excited to be considered for this position in order to contribute to the success of your team. Please feel free to reach out to me anytime via email at kimwilsonngo@gmail.com or phone at (714) 488 - 1996. Thank you for your time and I look forward to hearing back from you.

Best,

Kim-Wilson Ngo
